

Jeep Wrangler JL Tube Rocker Guard Installation Instructions

Thank you for purchasing our Jeep JL Tube Rocker Guards!

Installation notes:

- This kit is completely bolt on, no drilling is required
- Any factory or aftermarket side steps will need to be removed prior to installation
- It is recommended to test fit all components prior to painting or powder coating
- A factory service manual is recommended for instruction to remove any factory components

Tools Required:

- Metric ratchet and socket set
- Metric combination wrench set

Step 1:

Remove any factory or aftermarket side steps or rocker guards that may be currently installed on the Jeep.

Step 2:

Place the rocker guard on the correct side of the Jeep so that the 6 holes in the pinch seam line up (tabs to the outside of the body) and the 3 threaded holes in the bottom of the body line up with the holes in the brackets on the rocker guards. Once the holes are lined up install the 3 M8 bolts in the bottom of the body hand tight.

*Images shown without rocker for clarity of bolt locations

Step 3:

Install the 6 M6 bolts in the side of the rocker and through the pinch seam and start the M6 nuts on the backside.

*Image shown without rockers for clarity of bolt locations.

Step 4:

Tighten the 3 M8 bolts in the bottom of the rocker to 16 ft. lbs.

Step 5:

Tighten the 6 M6 bolts in the pinch seam to 8 ft. lbs.

Step 6:

Repeat steps 1-5 on the opposite side of the Jeep.

Congratulations you have completed the installation of your Jeep JL tube rocker guards!
